

Tank / Container Series - Cleaning Nozzle

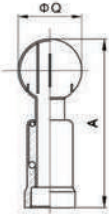

Nozzle Features

The 50046 economical rotating series tank washing nozzles are designed for small to medium tanks. This nozzle rotates under water pressure dispersing fans of liquid onto tank surface to maximize cleaning.

Nozzle Features

50053 series static spray balls are designed for small to medium tanks and under liquid pressure disperse solid stream jets in 180° and 360° spray patterns to maximize cleaning of internal surfaces. The spray ball is held on tube with a sanitary connection clip.
