

TANK / CONTAINER SERIES - CLEANING NOZZLE

Nozzle Features

The 50046 series economical rotating tank washing nozzles are designed for small to medium size tanks.

This nozzle rotates under water pressure dispersing fans of liquid onto the tank surface in order to maximize cleaning.

Nozzle Features

The 50053 series static spray balls are designed for small to medium size tanks.

Under liquid pressure, the nozzles disperse solid stream jets in 180° and 360° spray patterns in order to maximize the cleaning of internal surfaces. The spray ball is held on to the tube with a sanitary connection clip.

Nozzle Features

The 50050 series static spray balls are designed for small to medium size tanks.

Under liquid pressure, the nozzles disperse solid stream jets in 180° and 360° spray patterns in order to maximize the cleaning of internal surfaces. The spray ball inlet connection is threaded female.
