

# TANK / CONTAINER SERIES - CLEANING NOZZLE

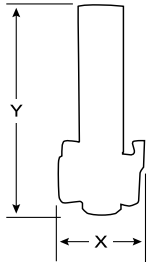

## Nozzle Features

The 40250 series economical rotating tank washing nozzles are designed to clean small to medium size tanks.

The nozzles rotate under water pressure, dispersing fans of liquid onto the tank surface in order to maximize cleaning.

Inlets are available in tube and threaded connections. A Sanitary clip holder is standard on all models and bolted versions are available on request.

NOZZLE TUBE CONN.	NOZZLE CODE	FLOW RATES (LPM @ BarG)				EFFECTIVE WETTING DIA. @ 2.0 BarG	APPROX. DIMENSIONS	
		1.5	2.0	3.0	4.0		(m)	X (mm)
1	40250	80	100	155	135	3.5	50	122
1-1/2		170	200	245	275	4.0	72	158
2		440	495	595	700	4.5	72	160

## Applications

- Milk Storage
- Sewage tanks
- Wine Tanks
- Process Vessels

## Ordering Example

- 2-40250-SSPA

## Available Materials

- 316SS / PA
- Other materials available on request.

# LARGE TANK SERIES - CLEANING HEAD

## Nozzle Features

The 60250 series rotating tank washing heads are designed to clean medium to large size tanks.

The heads are fitted with four jetting nozzles that rotate under water pressure, dispersing jets of liquid onto the tank surface in order to maximize cleaning.

There are two nozzle orifice sizes available so the best cleaning results can be achieved.

NOZZLE TUBE CONN.	NOZZLE CODE	NOZZLE SIZING (mm)	FLOW RATES (LPM @ BarG)					APPROX. CLEANING DIA. @ 5.0 BarG (m)	APPROX. CYCLE TIME (mins)
			3.0	4.0	5.0	7.0	8.0		
1	60250	4.0	80.0	100.0	116.0	140.0	150.0	7.2	8
		6.0	140.0	172.0	204.0	246.0	262.0	12.0	11
1-1/2	60250	4.0	80.0	100.0	116.0	140.0	150.0	7.2	8
		6.0	140.0	172.0	204.0	246.0	262.0	12.0	11

## Applications

- Fuel Tanks
- Paint Tanks
- Process Vessels
- Grain Silos
